

### Amendments to the Claims

1. (Currently Amended) A fragrant ornament, comprising as a part of the ornament a fragrance container, which is made of elastic material and has fragrance release pores ~~that completely or approximately hold~~ holding a aromatic substance fragrance inside when the container is not under the stress of being stretched and generally release fragrance when a shape of said fragrance container is changed by stretching.

2. (Currently Amended) A fragrant ornament according to claim 1 where the size of the diameter of the fragrance release pores can be changed by the elastic deformation of the fragrance container, so that the diameter of the fragrance release pores is enlarged when the fragrance container is under the stress of being stretched and the diameter is the same as or smaller than the effective diameter of an aromatic substance releasing the fragrance when the container is not under the stress of being stretched. ~~further comprising said fragrance container, which is capable of elastic deformation obtained by changing its shape, so that said deformation enlarges effective diameters of fragrance release pores that generally are the same as or smaller than said effective diameter of said aromatic substance contained in said fragrance container.~~

3. (Currently Amended) A fragrant ornament according to claim 1 wherein the ~~further comprising said fragrance container capable of said elastic deformation that enables diameters of said fragrance release pores, which are at least one of completely or~~ and approximately closed when the container is not under stress of being stretched at steady basis, release the fluid or evaporation of when the fragrance container is under the stress of being stretched. ~~to become larger than that of said aromatic substance by changing a shape of said fragrance container.~~

4. (Original) A fragrant ornament according to claim 1 wherein the fragrance container is an ornament body.

5. (Original) A fragrant ornament according to claim 1 wherein the fragrance container is a core material, connecting at least one of a plurality of ornament bodies

6. (Original) A fragrant ornament according to claim 5 wherein the fragrance container is a cord member attached to an ornament body.
7. (Currently Amended) A fragrant ornament according to claim 1 ~~further comprising at least one, selected from the group consisting of~~ straps, bracelets, necklaces, key rings, earrings, underwear, shirts, jackets, anklets, straps for glasses, hair bands, employee ID card folders and their straps, belts, buckles, neckties, tiepins, chains for tiepins, brassieres, straps for brassieres, garters, garter belts, footwear, straps for footwear, and antislipping parts for footwear.
8. (Currently Amended) A fragrant ornament according to claim 1 ~~further comprising said~~ wherein the fragrant container or a part of its connected member has an injection hole for injecting said ~~aromatic substance~~ fragrance and an exhaust hole for exhausting air.
9. (Currently Amended) A fragrant ornament according to claim 8 ~~further comprising wherein~~ at least one of said injection hole and said exhaust hole, which ~~generally are~~ is closed or keep said effective diameter smaller than that of said aromatic substance ~~change their shapes~~ changes shape when injecting said to pass said aromatic substance fragrance, thereby allowing an aromatic substance injecting device and air thereinto when said fragrance is injected to pass through said holes.
10. (Cancelled)
11. (Currently Amended) A fragrant ornament according to ~~any of~~ claim 1 ~~further comprising wherein~~ said fragrant container further comprises, ~~which has one tubular end;~~  
a tubular injecting device ~~that is~~ inserted into said tubular end,  
a fixing member ~~that fixes~~ fixing said tubular end of said fragrant container to said injecting device ~~by insertion~~; and  
a cap member ~~that seals~~ sealing an opening of ~~the other~~ another end of said

injecting device.

12. (Currently Amended) A fragrant ornament according to claim 11 ~~further comprising wherein~~ said cap member ~~which~~ is a connecting part with another parts.

13. (Currently Amended) A fragrant ornament according to claim 11 ~~further comprising wherein~~ said injecting device, comprises a connection mechanism connecting function so as to connect the cap member connected to another end of the fragrance container together.
